CERTIFICATE OF INDEPENDENT BID DETERMINATION

SBD 9

- 1 This Standard Bidding Document (SBD) must form part of all bids¹ invited.
- 2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a pe se prohibition meaning that it cannot be justified under any grounds.
- 3 Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:
 - a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution's supply chain management system and or committed fraud or any other improper conduct in relation to such system.
 - b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.
- 4 This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
- 5 In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.

Thus for every Rand provided by the program, the Implementation Agent should be able to provide at least the similar amount as own cash match funding.

2. BACKGROUND

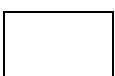

The Jobs Fund (also referred to as “the Fund”) is a Government initiative owned and funded by National Treasury. The specific goal of the Jobs Fund is to provide a mechanism that can identify and fund creative solutions to overcome identified short-term barriers to job creation and a better functioning labour market. Furthermore, the Fund’s aim is to catalyse innovation in job creation through structured and strategic private and public sector partnerships.

The Government of the Republic of South Africa acting through the National Treasury mandated the Government Technical Advisory Centre (also referred to as “the GTAC”) to execute, operationalise and manage the Fund on its behalf.

The Construction Industry Development Board (CIDB) has applied to the Fund for a Grant under the Catalysing Inclusive Economic Growth Funding Round of the Fund, wherein the CIDB was granted the Grant in accordance with the Fund’s terms and conditions. The CIDB will use the Grant to implement the Construction Industry SME Development Project, in accordance with the approved concept document. One (1) or Two (2) implementing agents will be selected as a result of this Expression on Interest process.

The aim of the Construction Industry SME Development Project is therefore to create a conducive environment for the development and growth of small businesses through:

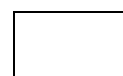

- the provision of enhanced financial and non-financial support services,
- competitiveness;
- market access;
- promotion of entrepreneurship;

7. IMPACT ASSESSMENT

The impact assessment/evaluation is based on functionality, which will be evaluated using the following criteria and points as set out below. Applicants are required to provide details on each of these impact assessment criteria (not more than 300 words per criteria)

7.1 Potential for job creation: Initiatives should demonstrate clear ability to create and sustain new permanent jobs in the long run, either directly through new models of job creation. Initiatives should be informed by a theory of change that clearly links the proposed intervention to sustainable job creation. This link should be plausible, demonstrable and measurable, and should not rest on unrealistic assumptions. The number of jobs that will be created would need to be clearly demonstrated. Jobs need to be recognised and measured in line with the Jobs Fund definitions.

7.2 Additionality: The Jobs Fund aims to support initiatives that would not have taken place without Jobs Fund support and risk sharing, because other funders consider the risk of failure too high or the projected financial return too low. Applicants should provide evidence of this in their application. The Jobs Fund will not distort or displace any current and on-going market activity or investment, rather it will step in and share risk in a manner that will make it more attractive for other funders to participate. Projects that are being proposed will be required to identify those risky components in the business model that still cannot be funded commercially and which require grant funding, after which it will make it more attractive for other funders to participate.

7.3 Sustainability: Initiatives should be able to convincingly demonstrate a path to commercial sustainability beyond the term of the Jobs Fund grant. This should illustrate the sustainability of the jobs created as well as the sustainability of the project itself. The vision for sustainability going forward and beyond the period of JF funding will be carefully assessed, and successful applications will clearly lay out a realistic path to sustainability that is rooted in the experience of implementation, and not reliant on heroic assumptions. Applications to clearly identify key measurable milestones over the project period to trigger funding.

7.4 Innovation: Initiatives must be considered new to a given society, South Africa or the world. This could include combining existing initiatives in new and interesting ways, taking existing initiatives into new areas, or using innovative models to create jobs or to overcome the barriers

For cidb

Witness

Bidder

Witness

to job creation. The degree to which the initiative can be considered innovative will be a key impact criterion.

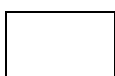

7.5 Own Cash Matched funding: The amount of own cash matched funding provided within the proposed intervention will be a key assessment criterion. Applicants must demonstrate value for money in converting Jobs Fund resources into impact and learning relevant to enhanced job creation. The Jobs Fund looks for the best ratio of outcomes achieved to total costs incurred. Applicants will need to demonstrate the risk carried by all parties compared to income derived from the project and what value the initiative will create for beneficiaries.

7.6 Capacity to implement, experience and track record: Applicants must demonstrate relevant experience, organisational capacity and key capabilities. In the case of a consortium applicants must elaborate on the consortium composition, it must be logical and value-adding and it must leverage the market position and capabilities of market players. Furthermore, applicants must demonstrate an appreciation of their proposed project's value/supply chain and the determinants of success. Applicants must have appropriate systems to collect, consolidate and report on financial and progress performance. Applicants are requested to provide supporting documents that show their track record within their particular industry.

7.7 Achieving Scale/Replication: The initiative must show how partners will be leveraged to multiply the outcomes; how costs will be kept low while increasing outputs; how and the extent to which the intervention/job creation model is replicable. Applications must demonstrate how the initiative will achieve scale/replication in terms of operations/product distribution/access to new markets/increased employment etc. Initiatives must outline the key activities that will be undertaken to achieve this outcome.

7.8 Value for Money: The Jobs Fund defines value for money in terms of risk sharing, economy, efficiency, effectiveness and equity. The Jobs Fund aims to leverage existing resources available within the economy. The amount of matched funding provided within the proposed intervention will be key assessment criteria. Applicants must demonstrate value for money in converting Jobs Fund resources into impact and learning relevant to enhanced job creation. The Jobs Fund looks for the best ratio of outcomes achieved to total costs incurred. Applicants will need to demonstrate the risk carried by all parties compared to income derived from the project and the value that will be created for beneficiaries. Projects should prioritise efficiency and cost-effectiveness in the way that the intervention is managed. Project should clearly indicate:

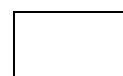

- With reference to the high-level budget submitted by the applicant, what the key project cost drivers are, and how these will be managed; and,
- With reference to the development impact, how the conditions for project benefits to be realised, e.g. completion of training and finally placement in a permanent job, will be tested and met throughout the duration of the project.
