

Inclusivity in the Industry

We are committed to an inclusive construction industry. Emerging contractors, women, and youth are given opportunities to grow and succeed through initiatives like the B.U.I.L.D Programme, the National Contractor Development Programme, the ERWIC Awards and WorldSkills.

Embracing Innovation

Innovation and knowledge are at the heart of our mission. Through our Centres of Excellence and partnerships with institutions of higher learning, we promote research, technological advancements, and the use of cutting-edge methods like BIM.

Our Foundation

The cidb is a Schedule 3a public entity established by the Construction Industry Development Act 38 of 2000. We are here to make a difference.

Together, we can build a better tomorrow.

Who We Are

At the Construction Industry Development Board (cidb), we are dedicated to building a thriving construction industry that improves lives and meets our country's infrastructure needs.

What We Believe

We believe that the foundation of a country's development lies in its infrastructure. Whether it's health, education, transport, communication, or housing, a strong infrastructure supports every aspect of life. By nurturing the construction industry, we lay the groundwork for a vibrant economy and a flourishing society.

Our Collaborations

Collaboration is key. Our motto, "development through partnership," reflects our commitment to bringing together industry resources and efforts to strengthen the industry's capacity to deliver better and contribute more to the economy and society.

Promoting Investment

We encourage investment in infrastructure, ensuring it continues to grow and create opportunities for people and businesses. Both government and private sector investments play crucial roles, with government contribution making up at least 40% of the effort. We build an industry that helps investors achieve their goals.

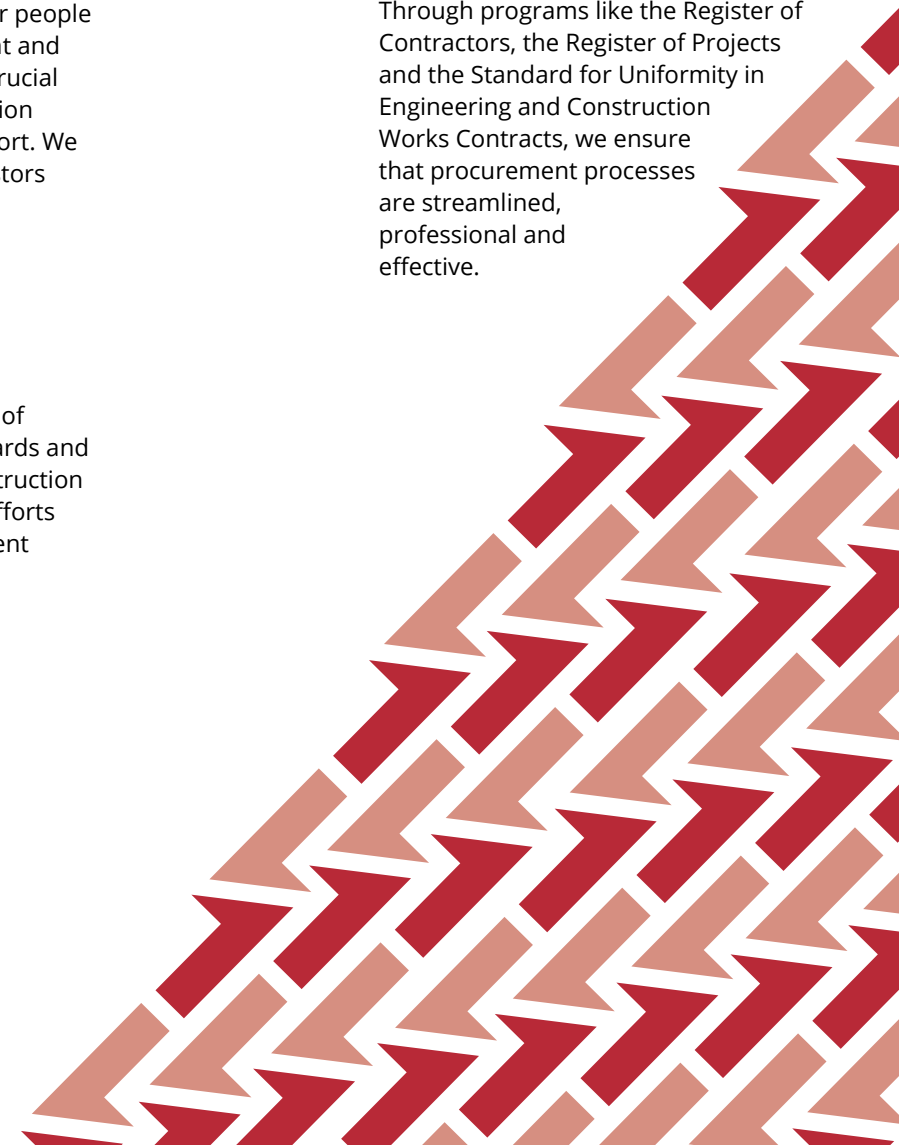

Supporting Government

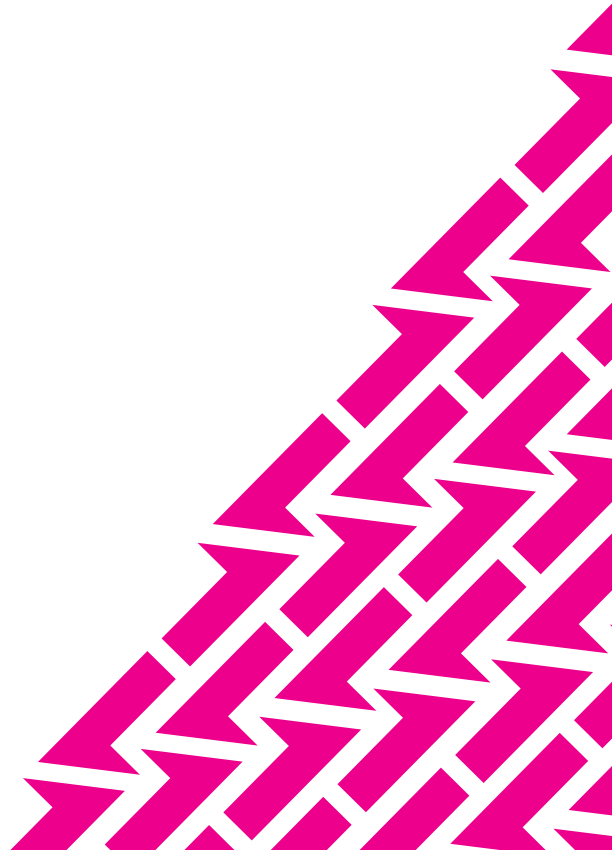

We back the government's vision of development by providing standards and best practices that enhance construction procurement and delivery. Our efforts help train officials, strengthen client capacity, and ensure projects are successfully implemented.

Professionalising Procurement

We see procurement as a vital part of delivering infrastructure efficiently. Through programs like the Register of Contractors, the Register of Projects and the Standard for Uniformity in Engineering and Construction Works Contracts, we ensure that procurement processes are streamlined, professional and effective.
